Contact Us:

TA Walling Solutions proudly bring new perspective to the specialist interior industry. Focusing on architectural acoustic treatments, with a zero limit approach to design capability, collaboration and installation.

Based in Northern Johannesburg, with over two decades of collective industry experience, Acoustic Walling Solutions have successfully researched and developed practical and efficient solutions for the architectural and design sector.

Our goal is to create workable, efficient and productive working environments in partnership with Architects and Designers, with solutions that offer end users a cost effective way to increase staff comfort, enhance performance and improve results.

With highly experienced in-house installation teams give peace of mind by meeting not only quality and efficiency requirements but trustworthy workmanship that can be relied on.

We pride ourselves in building long lasting transparent and meaningful relationships with our customers.
