

Overview

THULAFold™ is the first all South African Acoustic Operable Wall to enter the marketplace. Established in Johannesburg South Africa, we are proud to have been the pioneers of this great new product and brand. THULAFold™ is a refined operable wall designed to capture the essence of flexibility in the commercial sector, allowing for maximum space management, giving you better revenue yield and all-importantly..... OPTIONS.

Built from top to bottom, using locally sourced raw materials, THULAFold™ makes the perfect product that meets the testing, design, and quality guarantee for the South African and African market.

The product

Made with highest quality raw materials THULAFold delivers a flexible ACOUSTIC walling solution, Available in a Centre stacking (Centric) and as side stacking (Flank) suitable for all design configurations. Our 80- 100mm system offers a 48 & 51 STC rating based on what we believe to be the absolute minimum that defines an acoustic operable wall. Simplifying the option give our clients peace of mind that they will be receiving the very best value for money. With a wide range of Very Modern finishes available, protected by a concealed edge, we can offer eye catching and functional facings that will give an aesthetic appeal to every wall we deliver. Our partitions are designed and suitable for the following facilities:

- Conference Centres
- Auditoriums
- Hospitality
- Training Centre
- Schools
- Boardrooms

Features

- 48 – 51 STC Rating
- SoftCrank operating system for easy operation
- Improved acoustic interlocking vertical styles
- Magnetic seating technology for maximum panel guidance
- Additional tolerance for floors and ceilings
- World best track and carrier system
- NO SWEAP SEALS our refined acoustic end seals means sweep seals are no longer necessary
- Easy installation
