

Modern Acoustic Solutions

Bringing new perspective to the specialist interior industry.

www.tawalling.co.za

SOLUTIONS OVERVIEW

Ceiling Solutions

Acoustic performance from above.

PET baffles, clouds, lattice, feature ceilings and suspended acoustic systems designed to improve comfort and control noise.

Wall Solutions

Enhancing acoustics and aesthetics.

Wall cladding, decorative panels, slatted systems and custom acoustic wall treatments.

Division Solutions

Flexible privacy and collaboration.

Screens, dividers and workstation solutions that define spaces while reducing distractions.

Custom Solutions

Designed around your vision.

Bespoke acoustic features, lighting integration, architectural elements and custom-manufactured solutions.

THULAFold Operable Walls

Transforming spaces with flexibility.

Premium operable wall systems that allow environments to adapt quickly to changing requirements.

THULADoor & THULAGlow

Custom acoustic solutions.

Acoustic door systems and custom lighting solutions engineered to enhance privacy, comfort and architectural impact.

WHO WE ARE

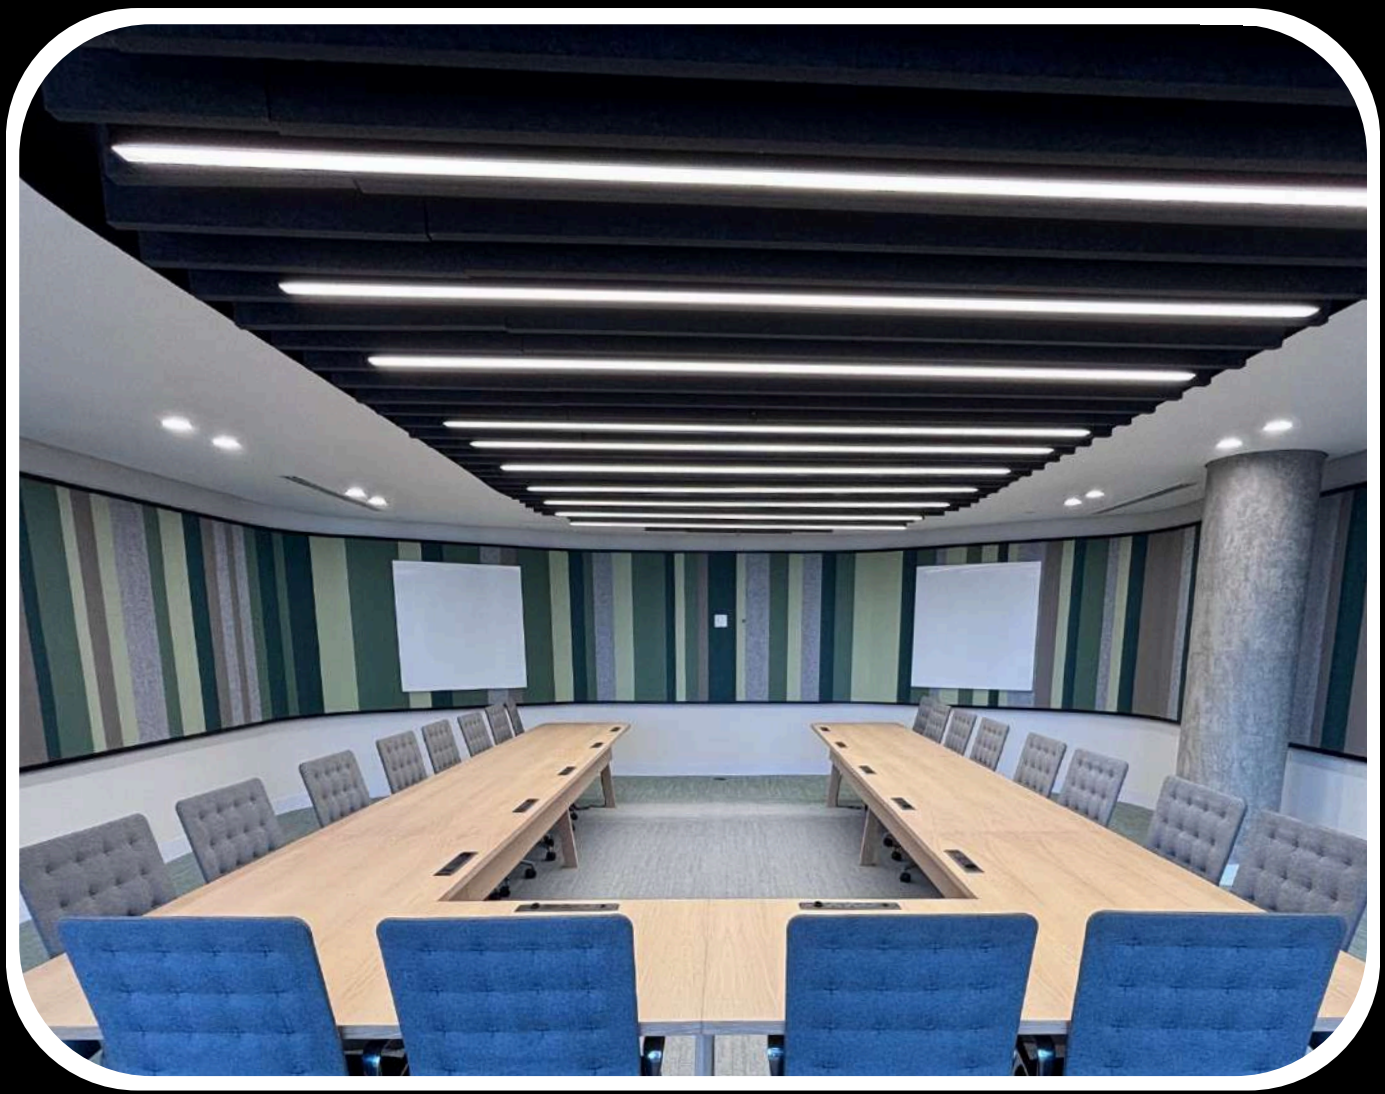

Proudly South African. Built to Solve.

A proudly South African business with over 35 years of collective industry experience, TA Walling Solutions delivers innovative acoustic and interior space solutions across the country.

Headquartered in Johannesburg, with a presence in Durban and operations in Cape Town, our team combines technical expertise, creative thinking and hands-on project delivery to bring every project to life.
From project managers and designers to manufacturing specialists and installation teams, we work collaboratively to provide end-to-end solutions that meet the unique requirements of each client and space.

National Reach. Local Expertise. Trusted Delivery.

Proudly South African. Innovative. Solution-Driven.

What is PET?

PET (Polyethylene Terephthalate) is a lightweight, durable polyester material commonly manufactured from recycled plastic bottles. When formed into acoustic applications, PET helps absorb sound and reduce unwanted reverberation within interior spaces.

PET CEILING SOLUTIONS

When noise becomes a distraction, your ceiling becomes the solution.

In today's workplaces, facilities and environments, sound plays a critical role in how people experience a space. Excessive reverberation and background noise can reduce concentration, affect communication and diminish comfort.

TA Walling's PET Ceiling Solutions are designed to create environments that sound as good as they look - combining outstanding acoustic performance with contemporary architectural design.

Designed Around Performance

Every project has different acoustic requirements. Whether you're creating collaborative workspaces, quiet meeting rooms or feature ceilings that make an impression, our ceiling systems deliver the flexibility to achieve both your performance and design objectives.

Our ceiling portfolio includes:

- PET Ceiling Baffles
- Acoustic Clouds
- Acoustic Lattice Systems
- Suspended Acoustic Panels
- Custom Feature Ceiling Installations

Architectural Freedom Without Compromise

Available in 48 colours, profiles and custom configurations, our ceiling systems become part of the architectural language of a space rather than simply an acoustic treatment.

Whether your vision is bold and expressive or clean and understated, every installation is tailored to complement the surrounding interior.

Great spaces don't just look impressive. They sound that way too.

PET WALL SOLUTIONS

Walls should do more than divide a space. They should define it.

Interior walls shape the way people experience an environment. They influence acoustics, reinforce brand identity and create memorable first impressions.

TA Walling's PET Wall Solutions combine acoustic performance with architectural design to transform ordinary walls into functional design features.

Design Without Limits

Bold feature walls.
Subtle textures.
Complete creative freedom.

Built Around Performance

Reduce reverberation.
Improve comfort.
Support better collaboration.

Crafted For Your Project

Colours.
Profiles.
Finishes.
Manufactured around your vision.

Available Solutions

- PET Wall Panels
- Acoustic Wall Cladding
- Decorative Acoustic Panels
- Slatted Wall Systems
- Custom Feature Walls

Every wall tells a story.
Make yours worth remembering.

TIMBACOUST SOLUTIONS

Natural warmth. Exceptional acoustic performance.

Beautiful By Nature

Some materials never go out of style.

Timber brings warmth, texture and character into commercial interiors, creating spaces that feel welcoming, sophisticated and timeless.

TA Walling combines this natural aesthetic with advanced PET acoustic technology, delivering interiors that are every bit as comfortable as they are beautiful.

WHY TIMBER?

Natural Warmth
Create inviting environments that leave lasting impressions.

Architectural Detail
Introduce texture, depth and visual interest to any interior.

Acoustic Comfort
Reduce reverberation while preserving the elegance of natural timber.

Available Solutions

- Timber Slat Wall Systems
- Acoustic Timber Cladding
- PET-backed Timber Panels
- Decorative Feature Walls
- Custom Architectural Installations

Where timeless materials meet modern acoustic performance.

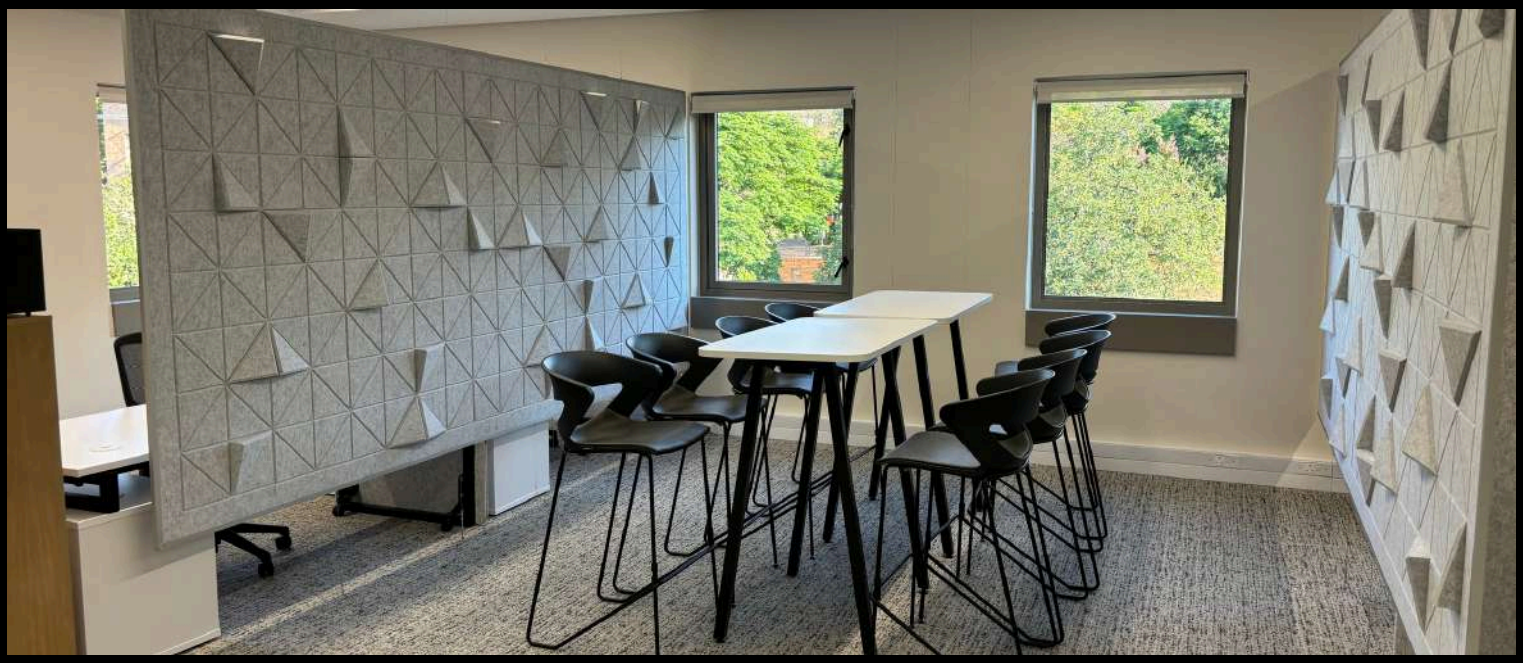

DIVISION SOLUTIONS

Better work starts with better spaces.

Designed For The Modern Workplace

Open-plan offices encourage collaboration, but they can also introduce noise, visual distraction and reduced privacy.

TA Walling's Screening Solutions help create workplaces that balance focus, flexibility and collaboration—without sacrificing openness or design.

Three Workplace Benefits

Focus
Reduce distractions and create environments where people can do their best work.

Privacy
Define personal space while maintaining an open, collaborative workplace.

Flexibility
Freestanding, desk-mounted and suspended solutions adapt as your workplace evolves.

Available Solutions

- Desk-Mounted Acoustic Screens
- Freestanding Dividers
- Hanging Acoustic Screens
- Privacy Partitions
- Workspace Separation Solutions

Great workplaces aren't built with walls. They're built with thoughtful spaces.

CUSTOM ACOUSTIC & INTERIOR SOLUTIONS

Some projects don't belong in a catalogue.

They belong here.

Every remarkable space starts with an idea.
Sometimes it's a sketch on a piece of paper.
Sometimes it's a conversation.
Sometimes it's a challenge nobody has solved before.
That's where we do our best work.

Designed.
Every custom project begins with understanding your vision, your space and your objectives.

Engineered.
Our team transforms creative concepts into practical, manufacturable solutions without compromising the original design intent.

Manufactured.
From bespoke acoustic features and integrated lighting to one-of-a-kind architectural installations, every solution is built with precision and purpose.

Your vision is the starting point. We'll help bring it to life.

THULAFold OPERABLE WALL SYSTEMS

One space. Endless possibilities.

Modern spaces need to adapt as quickly as the people who use them. THULAFold Operable Wall Systems allow a single environment to transform into multiple functional spaces - without compromising aesthetics or acoustic performance.

Built For Flexible Spaces

Whether dividing a conference venue, creating additional meeting rooms or maximising floor space within educational and hospitality environments, THULAFold provides the flexibility to reconfigure spaces with ease.

Our operable wall solutions include:

- Acoustic Operable Walls
- Glass Operable Walls
- Custom Configurations
- Manual & Automated Systems
- Large-span Applications

Performance That Moves With You

Engineered for reliability, acoustic control and everyday operation, every THULAFold installation is designed around the specific functional requirements of your project - delivering seamless operation and long-term durability.

Because great spaces should never stand still.

THULADoor ACOUSTIC DOOR SYSTEMS

Some conversations deserve complete privacy.

Privacy is more than closing a door. It's creating spaces where people can meet, collaborate and communicate with confidence.

THULADoor Acoustic Door Systems combine premium finishes with outstanding sound insulation, helping protect conversations while complementing modern commercial interiors.

Engineered For Privacy

Designed for boardrooms, executive offices, healthcare environments and meeting spaces, THULADoor reduces sound transfer without compromising architectural design.

Our acoustic door solutions include:

- Acoustic Door Systems
- Single & Double Door Configurations
- Vision Panel Options
- Custom Finishes & Hardware
- Integrated Partitioning Solutions

Designed Around Every Project

Available in a variety of finishes, hardware options and configurations, every system is manufactured to integrate seamlessly with your interior while delivering exceptional acoustic performance.

Privacy begins the moment the door closes.

THULAGlow ACOUSTIC LIGHTING

Lighting should do more than illuminate. It should inspire.

Exceptional lighting shapes the atmosphere of a space. THULAGlow combines architectural lighting with acoustic innovation to create environments that are both visually striking and acoustically comfortable.

Designed To Illuminate

Whether suspended above collaborative workspaces, integrated into feature ceilings or incorporated into bespoke architectural installations, THULAGlow transforms lighting into a design statement.

Key lighting solutions include:

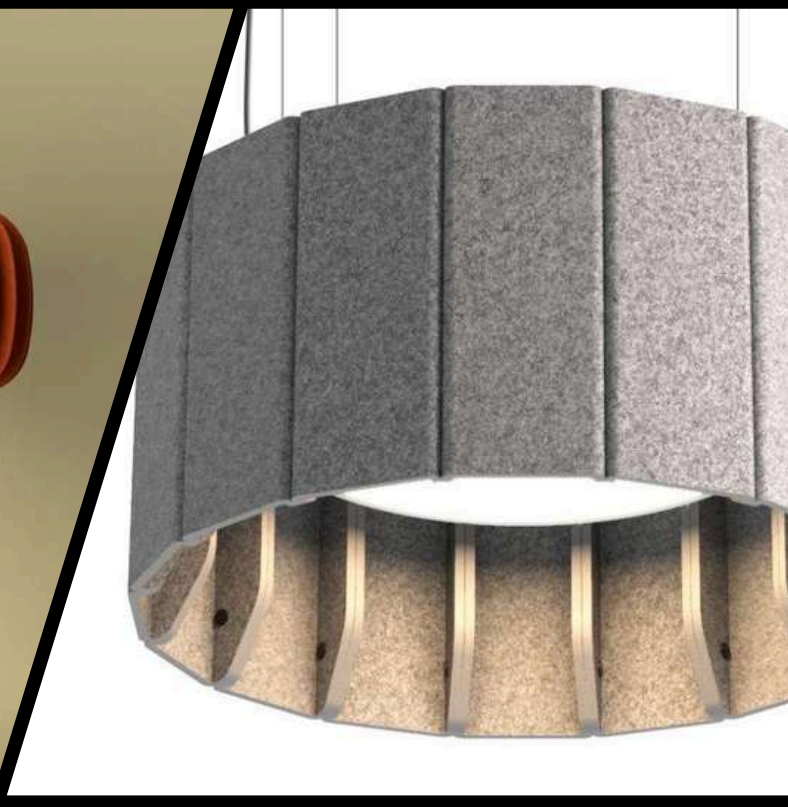

- Fully Customisable Lighting Designs
- Architectural Feature Lighting
- Integrated Acoustic Lighting
- Energy-Efficient LED Technology
- Bespoke Manufactured Solutions

Where Light Meets Design

Every THULAGlow solution is manufactured to suit the unique vision of your project, giving architects and designers complete freedom to create lighting features that elevate the entire environment.

Because the right light changes everything.

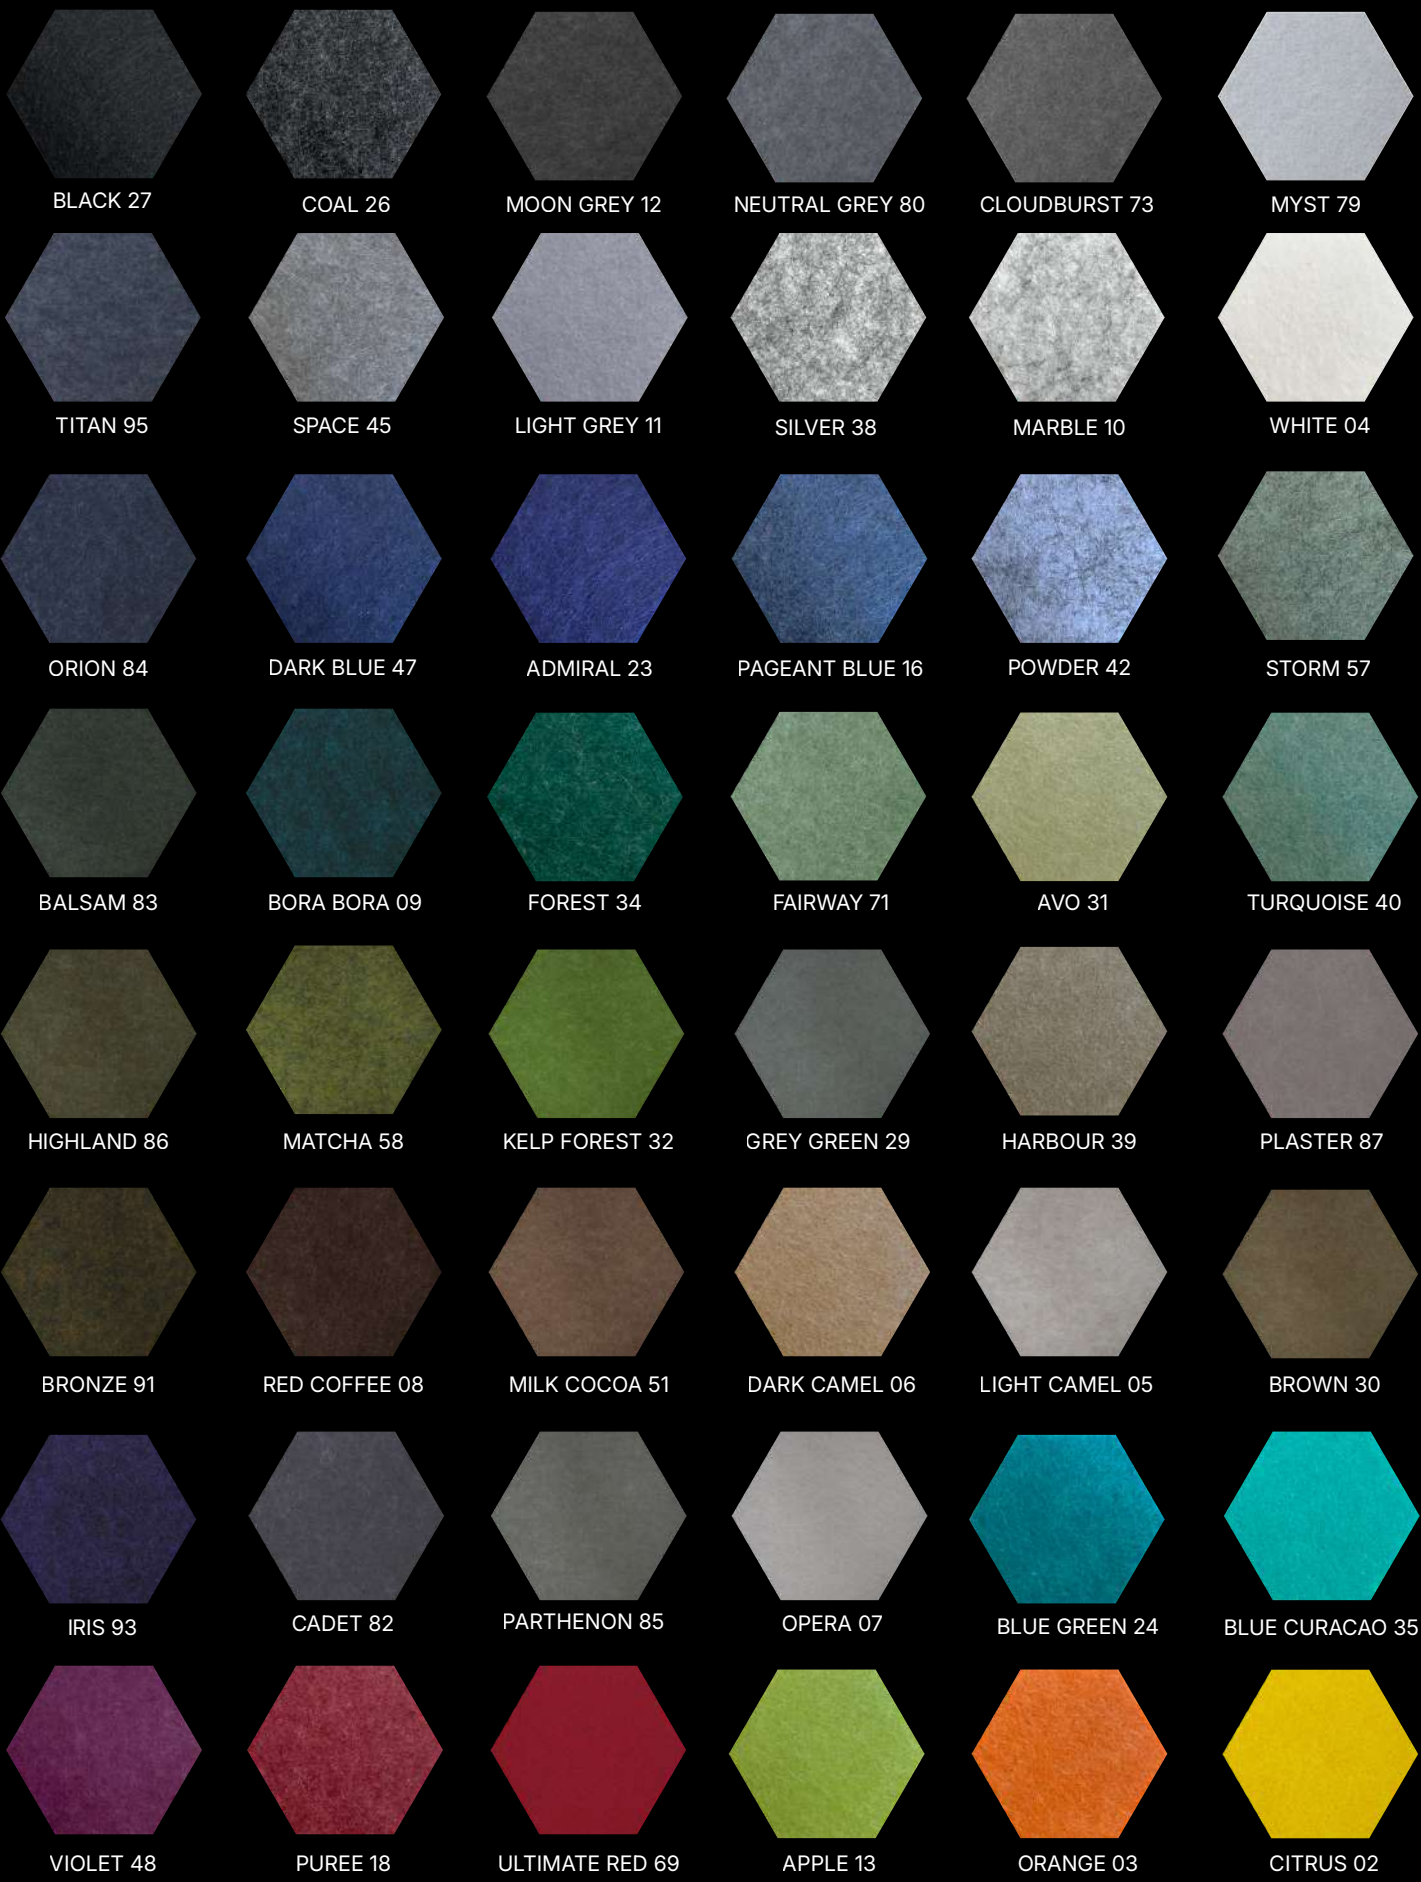

Available Colours

Our standard colour range offers the flexibility to suit a variety of architectural and interior applications. Whether you're creating a bold feature or a subtle finish, there's a colour to match your project.

Note: Colours shown are indicative only and may differ from the actual material. Please refer to physical samples for accurate colour selection.

Industries We Serve

TA Walling delivers acoustic and interior solutions across a diverse range of sectors, creating environments that balance performance, functionality and aesthetics.

Corporate Offices

Modern, productive workspaces

Educational Facilities

Acoustic comfort for learning and focus.

Hospitality

Comfortable spaces that leave a lasting impression

Conference Centres

Clear acoustics for every important conversation.

Government

Reliable solutions for public spaces.

Industrial Facilities

Acoustic control for safer, efficient operations.

Healthcare

Healing environments that support wellbeing.

Religious Buildings

Spaces that inspire connection and community.

Retail

Enhancing customer experience through smart design.

From Concept To Completion

One team. One process. Built around your project.

01

CONSULT

We understand your space, acoustic requirements, design intent and project objectives.

02

DESIGN

Our team develops a solution that balances performance, aesthetics and practical installation requirements.

03

CUSTOMISE

Colours, finishes, profiles, configurations and detailing are tailored around your project.

04

MANUFACTURE

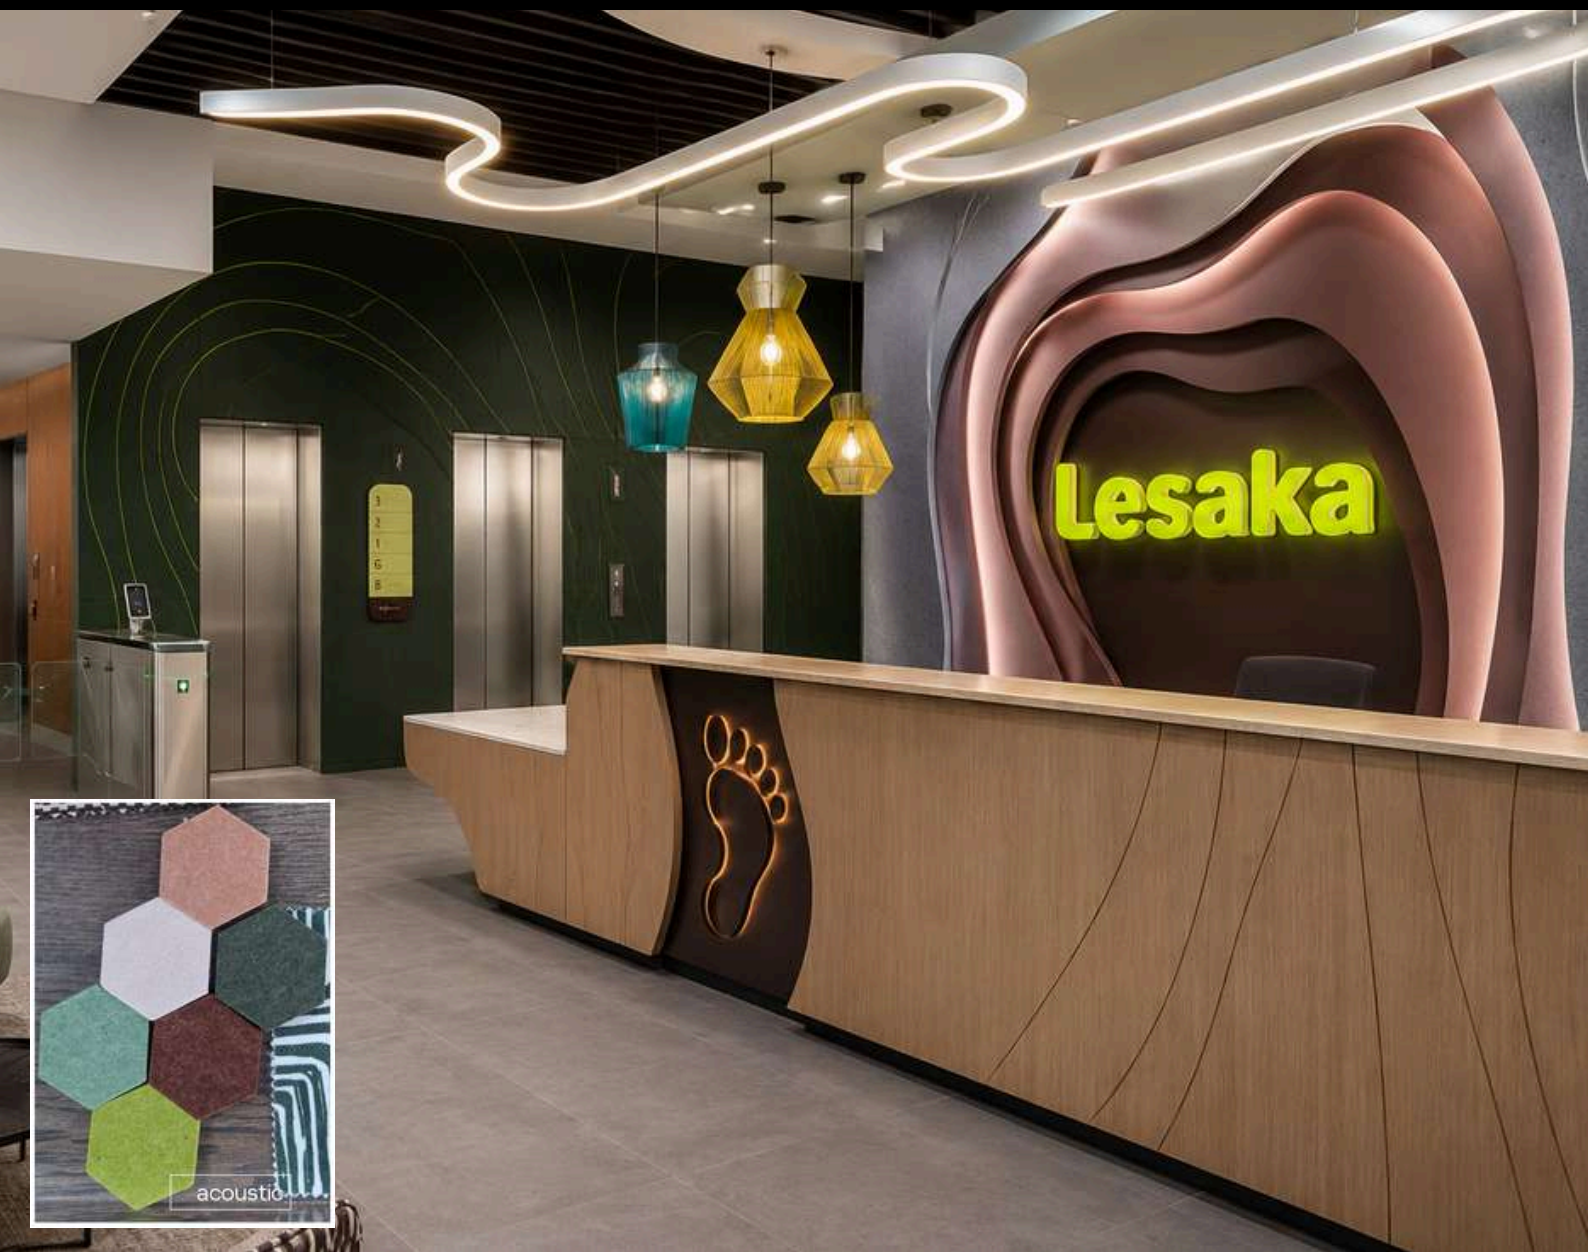

Solutions are manufactured with precision and quality control to meet the requirements of each installation.

05

INSTALL

Our experienced installation teams bring the solution to life on site.

From the first idea to the final installation, we make complex spaces simple.
